

National Incident Management System NIMS/ICS – 300

When..... NIMS 300 – **October 18-20, 2019 (6p-10p 18th, 8a-5p on 19th & 20th)**
Where..... **16619 State Hwy 155 South, Tyler, Texas (Noonday Fire Department)**
Fee..... **There is no fee for the course. Must attend all sessions to receive credit.**

Registration Information... <http://bit.ly/30zpjfS-NFA064-542>

Additional information..... [Mel Harper 903-561-1170 mel.harper@smithcountyfire.org](mailto:mel.harper@smithcountyfire.org)

WHO.....All members of volunteer, paid or part-paid departments of cities and industries who want the latest training in National Incident Management System and related skills. This training is recommended for all Emergency Response personnel, firefighters, hospital staff, law enforcement, public works/utility personnel, skilled support personnel and school, city and county officials who require a higher level of NIMS/ICS training.

WHY.....National Incident Management System training is one of the important elements that state, territorial, tribal and local entities must complete to become fully compliant with NIMS from FEMA and Homeland Security. Jurisdictions are required to meet the FY07 NIMS requirements as a condition of receiving federal preparedness funding assistance. ICS-300 and ICS-400 training will continue to be an essential NIMS training requirement in future years. During the conduct of this training, students move away from awareness training (IS-700, IS-800, ICS-100, and ICS-200) to practical application of ICS (i.e. establishing a command structure based on a scenario, development of an incident action plan, etc.). The next step in the training process will be for students to develop core competencies by completing ICS position specific training.

NIMS – ICS-300: Intermediate ICS for expanding incidents for first responders

This course is intended to serve as a vehicle to share proven incident management strategies and practices as well as to enhance teamwork and coordination among the agency's "mid-level managers and command staff" directly responsible for emergency response to incidents of all types; "all hazards" in which the Incident Command System (ICS) will be employed. The course utilizes scenarios and application exercises to highlight key issues and facilitate discussion. The concluding tabletop exercise is intended to allow participants to apply the information provided during the course in a controlled environment. Topics covered in this course include:

- Incident Command System Overview • Unified Command • Incident Response Management
- Incident/Event Agency Guidance / Develop SMART Objectives • Incident Action Planning with practical application (develop written Incident Action Plan)

Additional Information: **NFA Classes**
You must have a Student Identification (SID) number. Please bring your SID to class.

- Register at <https://cdp.dhs.gov/femasid>
- Save this number in a secure location
- Use SID in place of SSN on FEMA Form 119-25-1 & Form 119-25-

Facilitated By: Texas A&M Engineering Extension Service (TEEX), Emergency Services Training Institute (ESTI) and National Fire Academy.

TEEX Representative: Mark Weaver, 903-736-6631, mark.weaver@teex.tamu.edu

Classes are subject to change/cancellation without notice
